“Our long-term vision for the U.S. biorefining industry is based on sound economic sense. And ultimately, we plan to be competitive with oil at \$50 a barrel, without subsidies. We are planting the seeds here today for an industry that will be sustainable both environmentally and economically.”

Jim Imbler
ZeaChem President and CEO

“Companies like ZeaChem will help drive Oregon’s economy in the 21st century as well as move us toward greater energy security and independence.”

OR Gov. Ted Kulongoski

“Projects like the ZeaChem biorefinery in Boardman will help create jobs in a part of Oregon that badly needs them, while at the same time moving our nation a little closer towards less reliance on fossil fuel, both foreign and domestic. I look forward to biorefineries like ZeaChem’s taking their place in our nation’s menu of energy solutions.”

U.S. Senator
Ron Wyden

Left to Right: Marv Padberg, Commission President, Port of Morrow; Peter Murchie, Regional Advisor, Clean Energy & the Green Economy, Environmental Protection Agency; Mayor Chet Phillips, City of Boardman; Dan Verser, EVP of R&D, Founder, ZeaChem Inc.; Oregon Governor Ted Kulongoski; Jim Imbler, President and CEO, ZeaChem Inc.; U.S. Senator Ron Wyden; Tim Eggeman, Chief Technology Officer and Founder, ZeaChem Inc.; Valri Lightner, Deployment Team Leader, Office of Biomass Program, US Department of Energy; State Representative Greg Smith; Don Rice, Managing Director, Resource Management, GreenWood Resources; Diane Wolfe, Executive Director, Boardman Chamber of Commerce
